

15th Clinical Evaluation and Trials Board Decisions from the meeting of 26th and 27th January 2011

Full proposals

The following full proposals have been recommended for funding subject to certain conditions:

Project ref.	Applicant	Institution	Project Title
09/01/48	Dr Simon Griffin	Medical Research Council	Glucose Lowering In Non-diabetic hyperglycaemia Trial (GLINT)
09/104/16	Mr Charles Knowles	Queen Mary's University London	CONtrol of Faecal Incontinence using Distal NeuromodulaTion (CONFIDeNT)
09/144/09	Professor Anthony Marson	The Walton Centre for Neurology and Neurosurgery	A pragmatic randomised controlled trial comparing the effectiveness and cost effectiveness of levetiracetam and zonisamide versus standard treatments for epilepsy: a comparison of Standard And New Antiepileptic Drugs (SANAD-II)
09/144/50	Professor Sonia Johnson	University College London	Randomised controlled trial of the clinical and cost-effectiveness of a contingency management intervention for reduction of cannabis use and of relapse in early psychosis

Further information on the above projects will be provided on the HTA website, once the project has started.

Outline proposals

The following outline proposals have been shortlisted to submit a full proposal for consideration by the NIHR HTA Clinical Evaluation and Trials Board at its next meeting

Project ref.	Applicant	Institution	Project Title
10/57/08	Dr Fay Crawford	University of Edinburgh	Predicting foot ulceration in people with diabetes: An analysis of Individual Patient Data (IPD)
10/57/14	Professor William McGuire	Hull York Medical School	Randomised controlled trial of prophylactic enteral supplementation with bovine lactoferrin to prevent nosocomial infection in very low birth weight infants
10/57/20	Mr Matt Costa	University of Warwick	A randomised controlled trial of standard-of-care wound management versus negative pressure wound therapy in the treatment of adult patients with an open fracture of the lower limb
10/57/21	Professor Ann Ashburn	Southampton General Hospital	A Randomised Controlled Trial of the Effectiveness of PDSAFE to prevent Falls among People with Parkinson's Disease
10/57/22	Mr Graham Mowatt	University of Aberdeen	Systematic review and economic modelling of optical coherence tomography (OCT) for the diagnosis, monitoring and guiding of treatment for neovascular age-related macular degeneration
10/57/23	Professor Robert Pickard	University of Newcastle	Clarifying the management of men with recurrent urethral stricture disease: A randomised trial of open urethroplasty versus endoscopic urethrotomy (OPEN)

Outline proposals (continued)

The following outline proposals have been shortlisted to submit a full proposal for consideration by the NIHR HTA Clinical Evaluation and Trials Board at its next meeting

Project ref.	Applicant	Institution	Project Title
10/57/24	Dr Roshan das Nair	Nottingham University Hospitals NHS Trust	Rehabilitation of Memory following Brain Injury - a Phase III Randomised Controlled Trial
10/57/28	Dr Lindsay Smith	Peninsula Medical School	Effectiveness and cost-effectiveness of Nurse-led Hypertension Care versus general practitioner led care in Primary Care (ENHANCE) in newly diagnosed patients: a cluster-randomised controlled trial.
10/57/32	Professor Khalid Khan	Queen Mary, University of London	A randomised controlled trial of intra-operative cell salvage during caesarean section in women at risk of haemorrhage.
10/57/41	Dr Muhammad Javaid	University of Oxford	Enhanced recovery after hip fracture with rapid repletion of vitamin D: double blind randomized clinical trial of efficacy and safety [RED- HIP: Rapid repletion of vitamin D after HIP fracture]
10/57/43	Professor Simon Gilbody	University of York	Collaborative care for older people with established clinical depression
10/57/46	Mr Steve Brown	Northern General Hospital	A multi-centre, randomized controlled trial comparing rubber band ligation with haemorrhoidal artery ligation in the management of symptomatic second and third degree haemorrhoids.
10/57/51	Professor Sarah Lamb	The University of Warwick	A randomised controlled trial to determine the effectiveness of body weight supported treadmill gait retraining as an adjunct to rehabilitation of military personnel who have sustained life changing injury.

10/57/55	Dr Sue Moss	Institute of Cancer Research	Long-term follow up of a trial of annual mammographic screening from age 40
10/57/57	Dr Richard Holland	University of East Anglia	A factorial RCT of supervised vs unsupervised and daily vs twice weekly dispensing of opiate maintenance therapy in opiate dependent patients.
10/57/60	Dr Frances Game	Nottingham City Hospital NHS Trust	Evaluation of the feasibility of a future RCT (randomised controlled trial) to study the use of bone biopsy in the management of osteomyelitis of the foot in diabetes: the BBAB feasibility study
10/57/67	Dr. Divaka Perera	St. Thomas' Hospital	REVascularisation of Ischaemic VEntricular Dysfunction (REVIVED): a randomised comparison of percutaneous coronary intervention (with optimal medical therapy) vs. optimal medical therapy alone for heart failure secondary to coronary disease
10/104/06	Mr Toby Richards	University College London	Preoperative intravenous iron to PREVENT blood Transfusion in major surgery (PREVENTT)
